

Hartford Aviation Group, Inc.

About Us

Based in the central business district of the capitol city of Hartford, Connecticut, Hartford Aviation Group, Inc., has been serving the commercial aviation industry since 1985.

Our customers include flight test operators, major foreign and US passenger airlines and freight operators, and VIP operators. Our primary focus is supplying lease engines for use on wide-body, long-haul aircraft.

Engine Leasing

Our lease programs include long-and short-term operating leases, power-by-the hour and off-balance-sheet synthetic leases. Our investment and strict asset management strategies enable us to offer our clients the most competitive lease rates. We are not engine brokers.

CF6-80C2B1F
